Career Objective

Aspiring **Data Analyst** with a strong foundation in **Python, SQL, Power BI, and Excel**, passionate about transforming raw data into meaningful insights that support business decision-making. Skilled in **data cleaning, data visualization, and dashboard creation** to identify trends and improve operational efficiency. Adept at analyzing datasets, optimizing workflows, and presenting data-driven insights through interactive reports. Eager to leverage analytical and problem-solving skills to contribute to a data-driven organization.

Education

Bachelor of Science (B.Sc) in Computer Science
B. K. Birla Night College / University of Mumbai, India
CGPA: 8.85 | Graded A & A+ consistently

Tools & Technologies

HTML, CSS, Power BI, Excel, Python (Pandas, Matplotlib), SQL, HTML/CSS, PHP, MySQL, Git, VS Code, Dlib, OpenCV

Projects

- **Drowsiness Detection System – Python, OpenCV, Dlib**
  Built a real-time drowsiness alert system using facial landmark detection. Triggered alerts with sound when prolonged eye closure was detected. Integrated with a simple HTML frontend using Flask.

- **Regal Thread – Fashion E-commerce Website – PHP, SQL**
  Developed a fashion-focused e-commerce frontend with product galleries. Structured MySQL database and implemented user-friendly UI with static pages.

- **Car Sale Performance Dashboard – Power BI**
  Analyzed sales performance using slicers, KPIs, filters, and bar/line charts. Extracted business insights from raw data and built an interactive report.

- **Traffic Accident Analysis Dashboard – Power BI**
  Visualized accident data by state and severity using custom visuals, maps, and filters. Helped identify patterns and hotspots for road safety insights.

Languages Known

English, Hindi, Marathi

Notes

Open to internships and entry-level roles in data analytics, business intelligence, and data science. Portfolio and project repositories available on GitHub.
